

YOUR HOME ROUTER

TP-Link HomeShield, step by step

This sets up parental controls on your TP-Link Deco router with HomeShield, the one device that protects every phone, tablet, and computer on your home WiFi at the same time. It assumes your Deco is already installed. About 15 minutes.

BEFORE YOU START

Open the TP-Link Deco app, tap Parental Controls, and after you create a profile, assign your child's devices to it, or the controls will not reach them. One Apple note first: on each iPhone or iPad, open Settings, then Wi-Fi, tap the i beside your new network, and turn Private Wi-Fi Address off. iPhones change that address by default, and every change looks like a new device, which drops it out of its profile. Once per device and the profile sticks. In each picture, the pink box shows exactly where to tap. Watch for the Save steps: changes are only applied once you tap Save.

BEFORE YOU BUY

If you do not have a Deco yet: the TP-Link Deco BE65 two-pack (around \$420 to \$650, and Costco Canada has a 90-day return) covers most homes. A cheaper option with the same parental controls is the Deco BE25 three-pack, around \$410. HomeShield parental controls are about \$25 a year after the first year.

Layer 3 of the Castle Model, the router that protects every device at once.

SET UP A PROFILE

STEP 1

In Parental Controls, tap the plus sign, then tap At Home Profile.

STEP 2

Type a name for the profile and pick an avatar, then tap Next.

STEP 3

Set your child's age. HomeShield presets safe rules to match it, then tap Next. After this, assign your child's devices to the profile.

BLOCK WEBSITES

STEP 4

Tap your new profile to open it, then tap Blocked Websites.

STEP 5

Tap Add a Keyword or Website, type a site like youtube.com, and add it. Instagram and TikTok are common ones.

SAVE

Important: tap Save in the top right, or your blocked sites are not applied.

FILTER BY CATEGORY

STEP 7

Back on the profile, tap Web Filter.

STEP 8

Tap a category to block it. Mature Content, File Sharing, and Social are good starts.

SAVE

Important: tap Save in the top right to apply the categories you blocked.

FILTER SEARCH

STEP 10

Back on the profile, tap SafeSearch.

STEP 11

Turn SafeSearch on. It hides explicit results in Google and Bing. Toggles save on their own.

FILTER YOUTUBE

STEP 12

Back on the profile, tap YouTube Restricted (its own row, just below SafeSearch).

STEP 13

Turn on YouTube Restricted Mode to filter out mature videos.

BLOCK APPS

STEP 14

Back on the profile, tap Blocked Apps.

STEP 15

Tap a category to block its apps, like Social, Streaming & Media, or Chat & Messaging.

STEP 16

Or search by name. Type an app like Roblox, Snapchat, or Discord and tap to block it.

BLOCK APPS (CONTINUED)

SAVE

Important: tap Save in the top right, or your blocked apps are not applied.

SET TIME LIMITS

STEP 18

Back on the profile, tap App Time Limits.

STEP 19

Turn on App Time Limits, then tap Add Limits.

STEP 20

Choose which app categories the limit covers, then tap Next.

SET TIME LIMITS (CONTINUED)

STEP 21

Pick the days, then set how long per day, for example 1 hour. Tap Add.

STEP 22

Back on the profile, scroll down and tap Bedtime.

STEP 23

Open Bedtime, choose Every Day, and set overnight hours like 9:00 PM to 7:00 AM.

SAVE

Important: tap Save in the top right to lock in the bedtime schedule.

SET A DAILY TIME LIMIT

STEP 25

Back on the profile, tap Time Limits (its own row, below Bedtime).

STEP 26

Choose Every Day, then set one daily cap for all internet, for example 2h 30m.

SAVE

Important: tap Save in the top right to lock in the daily limit.

KEEP AN EYE ON IT

STEP 28

Anytime, open Top Visited Websites to see where they go. Tap any site and choose Block This Website.

ADD YOUR KIDS' DEVICES

STEP 29

On the Network tab, tap the Main clients box to see every device on your wifi.

STEP 30

Tap the device you want to assign. Every phone, tablet, and laptop on your wifi is here.

STEP 31

On the device's page, tap Family Member (Deco's name for the profile).

STEP 32

Pick the family member this device belongs to. Now every rule on that profile follows the device.

ONE THING ON EVERY APPLE DEVICE

STEP 33

On your child's iPhone or iPad, open Settings and tap Wi-Fi.

STEP 34

Tap the small i beside your home network's name.

STEP 35

Tap Private Wi-Fi Address.

STEP 36

Choose Off. Repeat once on every Apple device in the house.

GRANT TIME OR BLOCK

STEP 37

On the child's profile, you'll see two buttons at the top: Adjust and Block.

STEP 38

Tap Adjust to add or take away time for today only, then tap Confirm.

STEP 39

Tap Block to cut their internet right now, until you switch it back on.

That is the router layer done. Every device on your home WiFi is now filtered, time-limited, and paused overnight, all from one place.

WHAT THIS CATCHES, AND WHAT IT DOES NOT

The router protects every device on your home WiFi at once, harmful sites, blocked apps, time limits, and bedtimes, even a visiting friend's tablet. It cannot see a phone using cellular data: the moment a device leaves your WiFi, the router stops seeing it. That is the one honest gap. Pair this with the device controls (Apple Screen Time or Google Family Link) and a real conversation with your kids.

CHECK IT WORKED

On any device on your home WiFi, visit HomeNetworkCheckup.com. Your score should jump from around 30% to 70 or 80%. That confirms the baseline filtering is live. It does not measure social media or gaming, those are the apps and limits you set in the steps above.

KEEP GOING

This is one of five layers. Add the device controls on each phone (Apple Screen Time or Google Family Link), switch on the free CIRA Canadian Shield DNS filter, and put the Safe Family Internet decal in your window so other families know they are not doing this alone.
