

ROBLOX PARENT ACCOUNT

Set up and verify your account, step by step

This sets up your own Roblox account and verifies you as an adult. That verified adult account is the key that lets you manage your child's Roblox later: what they can play, who can chat with them, and what they can spend. You do not need to be techy. If you can follow a recipe, you can do this. About ten minutes. Nothing changes for your child at this stage: this is the key you need before you can set anything.

BEFORE YOU START

Do this on your own phone, with your own email, not your child's. Roblox now checks your age with a quick camera photo, not a credit card or government ID like it used to. The photo is used only for the age check. In each picture, the pink box shows exactly where to tap.

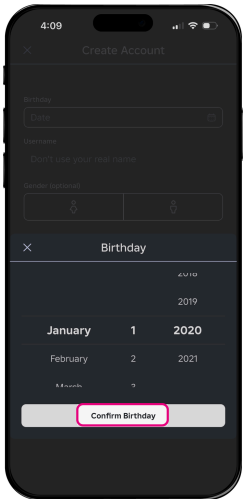

Layer 1 of the Castle Model, the Shield: the controls inside each game and console.

CREATE YOUR ACCOUNT

STEP 1

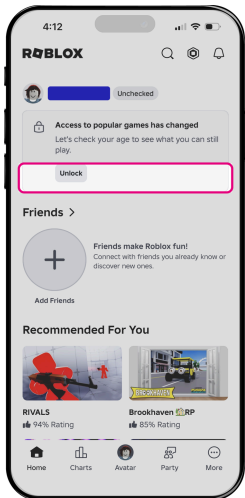

Download Roblox from the App Store and open it.

STEP 2

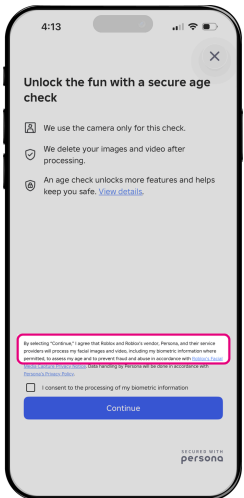

Tap Sign Up, enter your real birthday, then tap Confirm Birthday. Choose a username that is not your real name.

PROVE YOU ARE AN ADULT

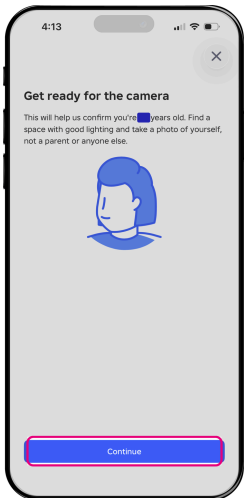

STEP 3

On the home screen, tap Unlock to start the age check.

STEP 4

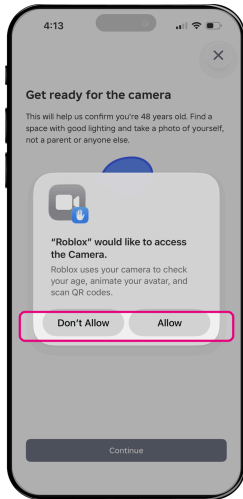

Read the secure age check, tick the consent box, then tap Continue.

STEP 5

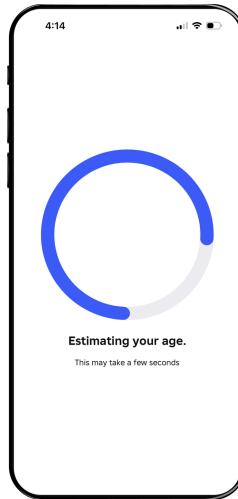

Find good light and tap Continue to take a photo of yourself. Roblox uses a camera age check now, not a credit card or ID.

PROVE YOU ARE AN ADULT (CONTINUED)

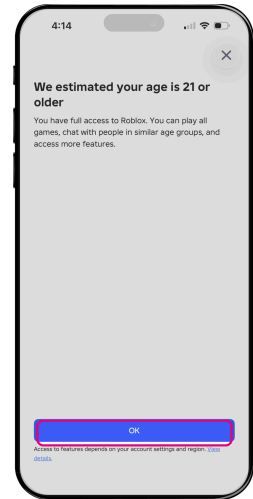

STEP 6

Tap Allow so Roblox can use the camera for the check.

STEP 7

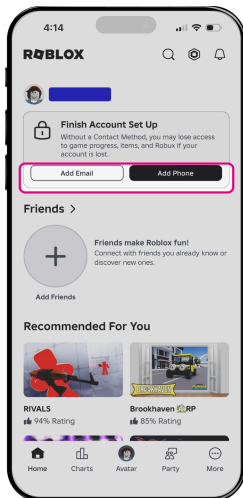

Roblox estimates your age. This takes a few seconds.

STEP 8

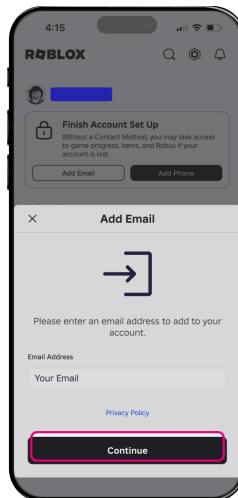

You are confirmed as an adult. Tap OK.

ADD AND VERIFY YOUR EMAIL

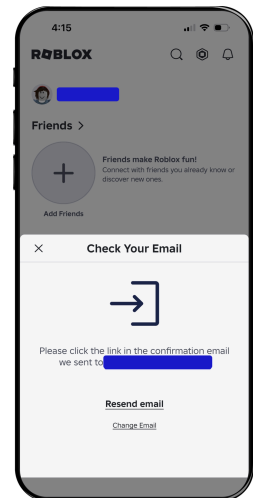

STEP 9

Back on the home screen, tap Add Email to finish setting up your account.

STEP 10

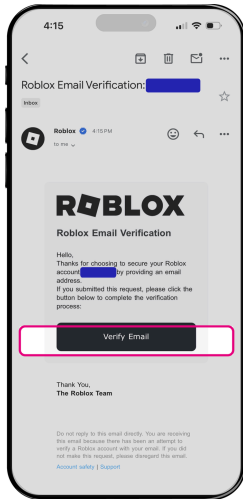

Type your email address and tap Continue.

STEP 11

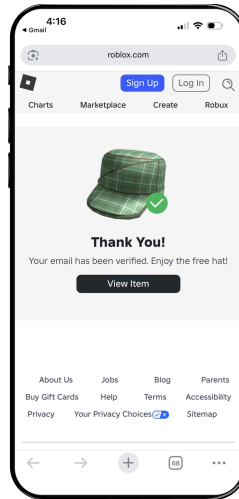

Roblox sends a verification link to your email. Go open it.

ADD AND VERIFY YOUR EMAIL (CONTINUED)

STEP 12

In the email from Roblox, tap Verify Email.

STEP 13

Done. Your email is verified and your parent account is ready.

That is your parent account created and verified. You now have the adult account Roblox requires before it will let you manage your child's settings.

WHAT THIS DOES, AND WHAT COMES NEXT

A verified adult account is the key to Roblox's parental controls, but it is the first step, not the whole job. Once it is set up you still need to link it to your child's account, which Roblox calls Family Pairing, and then set their content level, turn off chat with strangers, and cap spending. That is a separate short guide.

CHECK IT WORKED

Open the app again. The check your age and finish account set up banners should be gone, and your name should no longer show as Unchecked.

KEEP GOING

Next, link this account to your child's and set their content, chat, and spending limits, my Roblox parental controls guide covers that part. And this is one of five layers, add the device controls and your home router too, and put the Safe Family Internet decal in your window so other families know they are not doing this alone.
